ABOUT ME

I am a frontend developer js & react. I have **1.5** years of experience building commercial projects and working with interface design (interacted with Figma mockups), which allows me to implement web applications from start to finish. I also actively use React to create scalable interfaces and manage state with Redux. I dedicate all my free time to learning and improving my skills, backed up by projects.

All my skills are confirmed by real projects, which can be viewed via links on GitHub or in my portfolio **Portfolio**

HARD SKILLS

HTML semantics and methodology (BEM)

CSS with mobile responsiveness, including preprocessors (SCSS)

JAVASCRIPT (Vanilla)

REACT for building scalable interfaces

REDUX - **REDUX/TOOLKIT** for state management

React Router for navigation

Three.js for working with **3D** graphics

REST API (using **Axios** for HTTP requests)

WEBPACK, BABEL, **Vite** for project bundling

GIT/GITHUB for version control

Figma for integrating **UI/UX** designs

NPM package management

EDUCATION

Step IT Academy

Frontend developer | Dec 2021 - Dec 2022

Programming basics.
Project courses with a focus on web development and design.

Udemy

React developer | Aug, 29. 2023

Full course on React
Certificat

LANGUAGES

English (A2) - in the process of improvement
Ukrainian (native)

WORK EXPERIENCE

Frontend Developer

PROFI DEVELOPMENT
Dec 06, 2024 - to present

- Development of adaptive and cross-browser websites based on provided design layouts.
- Supporting existing websites: fixing bugs, implementing new features and improvements.
- Performance optimization: speeding up page load times and improving user experience (UX).
- Testing and debugging websites to ensure stable performance on different devices and browsers.
- API integration and work with backend services to implement website functionality.

PERSONAL PROJECTS

Book Library

Repository
Oct 19, 2023

- Controllable forms with which you can add authors and books to the list, as well as you can add a random book or get it via API
- All interaction is done with redux/toolkit.
- Set up filtering by author or book title, we can also mark our favorite book and filter the list of books by favorites.
- Deleting books from the list
- Check forms and warning if they try to add a book without author or title
- Also displays a warning if the api does not respond

Trialem

Repository
Jul 29, 2024

- The build is made on vite + vituum
- A lot of reusable component elements as well as modern approach of media queries for mobile adaptation use of mexins and use of css variables
- The slider is made with a swiper
- Tab functionality and card rendering
