

YEVHEN MARTYNIUK

FRONTEND DEVELOPER

0 50 740 6980 | mrtevgeniy@gmail.com | linkedin.com/evgmarty | github.com/EvgMarty | t.me/martyynn

PROFILE

I am a front-end developer with **3** years of experience building commercial web applications, specializing in **JavaScript**, **TypeScript**, and **React**. I use **Next.js** to build scalable user interfaces, along with **Redux** or other state managers to handle application state.

Working closely with designers during the implementation phase of **Figma** mockups, I turn them into **precise** and **responsive** interfaces. My back-end integration experience is extensive: **REST/GraphQL APIs**, payment systems, **WebSocket** connections for real-time notifications, and other asynchronous logic.

Special attention goes to product performance and quality — I regularly bring Lighthouse scores up to **90+**, ensure **cross-browser** and **cross-platform** compatibility, write unit and integration tests with **Jest**, and rely on **Git** for version control in collaborative development workflows. **SEO optimization** and **analytics integration** (pixels, metrics, and other tracking tools) are also part of my day-to-day work to improve product effectiveness.

I'm committed to continuous learning, staying current with new technologies and applying them in real-world projects.

WORK EXPERIENCE

Profi Development

Dec 06,2024 – Present

Frontend Developer

- Development of adaptive and cross-browser websites based on provided design layouts.
- Supporting existing websites: fixing bugs, implementing new features and improvements.
- Performance optimization: speeding up page load times and improving user experience (UX).
- Testing and debugging websites to ensure stable performance on different devices and browsers.
- API integration and work with backend services to implement website functionality.

PERSONAL PROJECTS

Mar 17,2026

Memory Game

[Repository](#)

- Interactive memory card gameplay with smooth flip animations
- Pair-matching logic with automatic hiding of mismatched cards
- Move counter and game timer
- Win modal with game results
- Adjustable number of card pairs (4, 6, 8, 12, 24)
- Sound controls with adjustable volume
- Modern, responsive design for desktop and mobile devices
- Clean, maintainable codebase (HTML, CSS, Vanilla JS)

SKILLS

HTML	CSS/SCSS	JAVASCRIPT	TYPESCRIPT	REACT	REDUX	REACT ROUTER	NEXT.js	REST API	
WEBPACK	VITE	JEST	PHP	GIT/GITHUB	FIGMA	NPM/YARN	THREE.js	DOCER	WEBSOCET
JIRA	KEITARO	MATOMA	POSTMAN						

EDUCATION

Step IT Academy

Frontend developer | Dec 2021 - Dec 2022

Programming basics.

Project courses with a focus on web development and design.

Udemy

React developer | Aug, 29. 2023

Full course on React
